

AHMAD FARES AL-TRABEEN

JUNIOR .NET DEVELOPER

Amman, Jordan | +962 775534805 | ahmaddev.jo@gmail.com | [Linkedin](#)

Summary

Junior .NET Developer with a solid foundation in C# and .NET Framework, experienced in developing desktop applications. Familiar with object-oriented programming (OOP), basic database integration, and writing clean, maintainable code. Motivated to learn, improve skills, and contribute to real-world software projects within a collaborative development team.

Technical Skills

- **Languages & Frameworks** : C++ , C# , WinForm , ASP.NET Core MVC
 - **Databases & Data Access** : SQL Server , ADO.NET , CRUD , ERD Modeling
 - **Web Development** : HTML , CSS, JavaScript (Basics)
 - **Architecture & Clean Code** : OOP , Data Structures , Algorithms , Three-tier architecture , MVC
 - **Soft Skills** : Problem Solving , Collaboration , Adaptability , Self Learning
-

Projects :

● Graduation Project – “Focus and Read”

Educational web application built with ASP.NET Core MVC to improve focus and productivity for ADHD learners. Features Pomodoro timers, virtual classes, and AI-based summarization and quiz generation. Developed as a graduation project with primary responsibility for back-end and database development.

● Driver Licensing Management System(DVLD)

I am currently working on a Comprehensive C# WinForms desktop application integrated with SQL Server to manage the full driving license lifecycle. Supports user and people management, local and international license applications, testing, issuance, renewal, replacement, and detention processes. Built with layered architecture (Business & Data Access), clean code practices, and a fully normalized relational database.

Internship Experience:

Jordan Commercial Bank – IT Intern (Technical Support & Infrastructure)

- Provided technical support to employees and resolved daily IT issues.
- Performed device formatting, setup, and basic troubleshooting.
- Gained introductory experience with Active Directory and server room environments.
- Trained with the Infrastructure team, learning database administration fundamentals with the DBA team.
- Acquired basic knowledge of APIs within Middleware and an overview of network architecture and topology.

Programming Advice Platform – Software Development Roadmap

- Completed a structured, multi-level roadmap focused on clean code and advanced problem-solving.
 - Gained hands-on experience in C++ and OOP, advanced to C# (OOP, WinForms), and studied SQL across multiple levels including ERD, CRUD, ADO.NET, and three-tier architecture.
-

Education

B.Sc. of Computer Science and its applications | The Hashemite University | Feb 2022 – Jan 2026
